**Subject:** Testimony for Feb 13 Energy Committee Meeting

My DTE bill was over \$100 more than the previous months bill...  
after they threatened to shut off my power if I did not let them install a smart meter..On dec 4 against my request to keep my analog..they installed it..  
I was shocked to see my bill..  
I called DTE and they gave me excuses such as "do you have a space heater. I said NO, well Christmas lights? ..NO we did not use any outside lights this year for the first time..and we were not home part of the time and so except for a small night light...my usage should have gone down..  
They said they would send someone out to check the meter...NO ONE has shown up yet  
and the latest bill is up also over what is my usual bill when I had an analog..
